

KHATRI MAHMADFAIZ KASAM

Full-Stack Developer • AI Engineer • GenAI Enthusiast

Ahmedabad, Gujarat, India | +91 9408443776 | faizkhatri1819@gmail.com

Portfolio: faiz-jade.vercel.app | GitHub: github.com/faizkhatri196

PROFESSIONAL SUMMARY

Driven Full-Stack Developer and AI/ML Engineer pursuing BE in Information Technology (CGPA: 7.96) at GEC Modasa. Proven ability to architect and ship production-grade web applications and AI-powered tools that solve real-world problems. Hands-on freelance and industry experience delivering GenAI-integrated solutions, predictive AI models, and full-stack web applications. Passionate about bridging cutting-edge AI research with practical, user-facing products.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, TypeScript, Responsive Design

Backend: Node.js, Python, MongoDB, REST APIs

AI / ML: Agentic AI, RAG, Langchain & Langgraph, Prompt Engineering

Libraries: NumPy, Pandas, Scikit-learn

Tools: Git & GitHub, VS Code, Anaconda Navigator, Vercel, Antigravity

PROFESSIONAL EXPERIENCE

Full Stack Developer — Sysslan IT Solutions

July 2026 – Present

- ▶ Working as a Full Stack Developer building full-stack web applications end-to-end, covering front-end (React.js), back-end (Node.js), and database layers.
- ▶ Serving as event organizer for company tech events, coordinating planning, logistics, and execution alongside development responsibilities.
- ▶ Owning end-to-end deployment of web applications — from development and testing through to production release — ensuring smooth, reliable rollouts.

Freelance Web & AI Developer — Upwork

2024 – aug 2025t

- ▶ Delivered 5+ freelance projects spanning full-stack web apps and AI-integrated dashboards, maintaining strong client satisfaction ratings.
- ▶ Reduced client manual data-entry workload by ~40% via automated Python pipeline integrated with a React.js front end.
- ▶ Built responsive, mobile-first interfaces that cut average page load time by 30% through targeted performance optimisation.
- ▶ Collaborated with international clients across time zones, converting ambiguous briefs into polished, production-ready deliverables on schedule.

KEY PROJECTS

AI Interview Co-Pilot *React.js | Node.js | GenAI | NLP*

- ▶ Engineered a real-time AI-powered interview prep platform using LLM APIs — generates role-specific questions, evaluates answers instantly, and cuts user prep time by ~50%.
- ▶ Integrated NLP-based answer scoring (tone, keyword density, structure analysis) achieving ~85% alignment with human evaluator scores in pilot testing.
- ▶ Deployed full-stack app on Vercel with zero-downtime, supporting concurrent multi-user sessions seamlessly.

Smart Tourist Guide App *React.js | Node.js | MongoDB | REST APIs*

- ▶ Developed a full-stack AI-assisted guide delivering personalised destination recommendations and itinerary planning across 50+ destinations.
- ▶ Implemented MongoDB Atlas geo-indexed queries, reducing location-based response time by 60% vs. non-indexed alternatives.
- ▶ Added multi-language support to expand the accessible user base to non-English-speaking markets.

Job Predictor — Resume & LinkedIn Analyser *Python | ML | NLP | Scikit-learn | Pandas*

- ▶ Built an end-to-end ML pipeline parsing resumes and LinkedIn profiles (20+ extracted features) to predict job-role fit with 82% accuracy on the test set.
- ▶ Applied TF-IDF and Named Entity Recognition on 10,000+ resume samples for model training using Scikit-learn and Pandas.

- ▶ Designed a skills-gap analysis module generating actionable upskilling recommendations, projected to lift placement probability by ~35%.

EDUCATION

Bachelor of Engineering — Information Technology

2024 – 2028

Government Engineering College (GEC), Modasa, Gujarat | Current CGPA: 7.96 / 10

- ▶ Currently in 3rd Year (5th Semester) with strong performance in Data Structures, DBMS, and Web Technologies.
- ▶ Active in college hackathons, technical fests, and the coding club.

CERTIFICATIONS

- ▶ NPTEL — Python for Data Science (Completed with distinction)
- ▶ NPTEL — Deep Learning (CNNs, RNNs, Transfer Learning — Completed)
- ▶ Self-directed learning: Generative AI, Prompt Engineering, LLM fine-tuning.
