Education

GEC Modasa — Gujarat, India
Bachelor of Engineering - Information Technology; SPI: 8.55/10 — *2024 – 2028*

Experience

Full Stack Developer — July 2026 – Aug 2026
Sysslan IT Solutions — *Ahmedabad, India*

- Built full-stack web applications with **React.js**, **Node.js** and database layers.
- Owned **deployment** end to end, from development and testing to production release.
- Organized company tech events, coordinating planning, logistics, and execution alongside development work.

Freelance Web & AI Developer — May 2024 – Aug 2025
Upwork — *Remote*

- Delivered **5+ freelance projects** spanning full-stack web apps and AI-integrated dashboards for remote clients.
- Cut client manual data-entry workload by ∼**40%** via an automated **Python** pipeline with a **React.js** front end.
- Built responsive, mobile-first interfaces that reduced average page load time by **30%** through performance optimization.

Projects

AgentShield | *AI Agents, PayPal Sandbox, IntentGuard, Payment Security*

- Built a **secure gateway** between AI agents and **PayPal** that enforces **spending limits, merchant rules, and payment policies** before any money moves.
- Designed AI-powered **IntentGuard** to flag suspicious payment requests and **prompt injection**, with risky transactions held for **human approval**.
- Routed approved payments through **PayPal Sandbox** with budget tracking, payment verification, and **tamper-evident audit logs**.

AI Interview Co-Pilot | *React.js, Node.js, GenAI, NLP*

- Built a real-time **AI interview-prep platform** that generates role-specific questions and evaluates answers instantly, cutting user prep time by ∼**50%**.
- Added **NLP-based answer scoring** (tone, keyword density, structure), reaching ∼**85%** agreement with human evaluators; deployed on **Vercel**.

Job Predictor – Resume & LinkedIn Analyser | *Python, ML, NLP, Scikit-learn, Pandas*

- Built an **ML pipeline** parsing resumes and LinkedIn profiles (20+ features) using **TF-IDF** and **NER** on 10,000+ samples to predict job-role fit with **82% accuracy**.
- Added a skills-gap analysis module that recommends skills to learn for a target role.

Certificates / Achievements

- **300+ LeetCode Problems Solved**: Strengthened data structures and algorithms proficiency through consistent problem solving.
- **250+ Aptitude Questions**: Solved quantitative and logical reasoning questions as part of placement preparation.
- **NPTEL – Python for Data Science**: Completed with Distinction. **NPTEL – Deep Learning**: CNNs, RNNs, Transfer Learning.
- **Self-directed Learning**: Generative AI, Prompt Engineering, and LLM Fine-tuning.

Technical Skills

Frontend: JavaScript, TypeScript, React.js, Responsive Design
Backend & Databases: Node.js, Python, MongoDB, REST APIs
AI / ML: Agentic AI, RAG, LangChain, LangGraph, Prompt Engineering, NumPy, Pandas, Scikit-learn
Cloud: AWS Bedrock
Tools: Git, GitHub, VS Code, Vercel
